Every Inch of the Bates Steel Mule is Thoroughbred

The United States government by means of the Departsigned to go to an association training 23 to 16.4 per 1,000 population, a ment of Agriculture, has been looking into the tractor quescording to Dr. E. C. Levy, Direct tion, and its bulletins clearly proves that the satisfied tract-17, Odd Fellows, is advertising for the weekly luncheon of the Kiwar or owner—men who say that the tractor has paid—are men sale its home on Twelfth street, and Club in the Business Men's Cl who own the BETTER CLASS of tractors. The sucple on Church street, between Levy, "there are more than 5,000 pl cessful man has learned years ago, that he can't get something for nothing. No one can. The reason the BATES STEEL MULE costs more is that it is worth more. Skilled factory procedure, quantity production and the most modern Machinery enables us to save money at every turn, yet the BATES STEFL MULE cost slightly more in the beginning to build but considerably less in the long run to own. It's just another case where a seemingly higher priced article is ar cheapest to own when you come to actually USE it.

The Bates thoroughbred quality comes not from mere claims, but from what's put into it. Every part that goes to make up the BATES STEEL Mule is put there by long field experience. There is'nt a part that is'nt time-tried and tested. There is'nt a part that experience has'nt dictated the shape and size of; and in it all there is'nt one superfluous part, nor one part that isn't capable of standing up under twice the strain it gets in actual use. These are things experience and practice have distracted. The BATES comes to you as a fulfil ment of your desire for a tractor that will endure. Price is what we pay for a thing. Value is what we get out of it. Consider your tractor from what you will get out of it, consider how many working days you have when the ground is wet, consider the operations where you can not afford to pack your seed bed, and consider how constantly and economically they must be performed even in rush times, you will then see why the BATES STEEL MULE is the biggest value offerd in any tractor on the American market today.

### Certain-teed Roofing Resists Fire

Certain-teed Roofing is fire retarding and spark proof; consequently your fire risk is greatly reduced when Certain-teed roofs your buildings.

Burning embers carried by the wind from nearby fires are Tways a menace to old fashioned, inflammable wood shingle roofs. Certa a-teed forms a permanent protection against sparks and embers and all such carriers of fire. Because of the great risk of general

configrations in conjected districts,

and of the lack of safe fire protection

in the outlying and rural districts you

should get this Certifa-teed protec-

tion on your buildings.

In addition to being fire resisting, Certain-teed is a most economical roof. It resists all forms of weather attack-rain, sleet, snow, sun, etc. It is guaranteed by the manufacturer for 5, 10 or 15 years, according to the

weight you select. There is a scarcity of many types of roofing products—you can always get Certain-teed Smooth Surfaced Roofing, the most economical and cervice-

able roofing to be obtained. See your dealer at once. He either has Certain-teed or can get it quickly from a nearby Certain-teed ware-
